

# Turn buyer searches into pipeline.

Your buyers are already searching for what you sell on Google, ChatGPT, Perplexity, and Gemini. Gushwork makes sure you show up when they do. We build 100+ targeted pages on your website matched to those exact searches, rank them, and turn that intent into qualified leads landing in your inbox from month 3 onwards.

No marketing team needed. No SEO learning curve. You put in a credit card and get more business.

## How it works?

### Q MONTH 1

We learn about your business, buyers, and competitors. Then we build your search strategy and start publishing pages.

### MONTH 2+

Our AI agents monitor page performance and continuously optimize based on what drives leads. In parallel, backlinking agents build links to improve rankings.

### MONTH 3+

As more pages get indexed and optimized, you start seeing qualified inbound leads. This is a compounding channel, not instant ads.

It's a compounding channel not instant ads.

## What you get, everymonth...

### 🔍 Qualified leads to your inbox

Spam-filtered, organised, and ready to action from your dashboard.

### 📊 Weekly progress reports

From your dedicated account manager, every Friday.

### ✅ Content that's permanently yours

If you ever leave, it stays on your site and keeps working.

## What customers are saying

"Gushwork has saved me time, money and a whole lot of headaches."

**Stephanie Snyder**

Owner, Source Equipment

[▶ Play Video](#)

"Revenue generated is 20 to 30 times the initial investment. One single deal was worth \$150K."

**Ryan Cimo**

CEO, Fraxtional

[▶ Play Video](#)

## Results from customers like you...

📈 John Maye Company got 25+ leads in first 30 days

📈 Source Equipment is getting 40+ leads/month

📈 Midwest Power Products got \$100K+ in pipeline

📈 Trash Truck Rental is fully booked within 90 days

📈 Fraxtional generated \$400K revenue from inbound in 10 months

## No lock-in contracts. Cancel anytime.

The math: Most customers need just 1-2 new deals per year to cover the full cost of Gushwork.  
Average deal size with our customers is \$30K-\$300K.

### Launch

Includes everything in Grow, plus

- ✓ 40 High Quality Backlinks
- ✓ Priority Content Refreshes
- ✓ Custom Analytics Views
- ✓ Quarterly Business Reviews
- ✓ Priority Support through Email or Slack

## A few things worth knowing...

### ✖ We're not an agency

Agencies bill hours and send reports. We're a software company. 100+ pages per 6 months cost \$3K-\$5K/month at a traditional agency. We do it for \$800.

### ✔ You own everything

If you stop working with us, all content stays on your site. Rankings and traffic don't disappear.

### 📊 We measure leads, not traffic

Our dashboard shows you qualified inquiries, not vanity metrics.

## "Can't we just use ChatGPT or Claude for this?"

01

### ChatGPT Doesn't Know Your Business

It writes generic content based on what's already on the internet. We build a Brand Memory Agent that learns your products, buyers, credentials, and voice so every page sounds like you, not like AI.

02

### Publishing Once Isn't Enough

ChatGPT can draft a page. It can't publish 100+ pages to your site, build backlinks to them, refresh them every 15 days as Google updates its algorithm, and track which ones are generating leads. That's the full system we run.

03

### Your Team's Time Is Worth More

Even if your team can use ChatGPT well, doing this properly takes 20+ hours a week including research, writing, publishing, back linking, optimising. We handle all of it. Your team focuses on closing the leads we send.

Your buyers are searching for you right now. **They just can't find you.**

Reply to this email to book a 20-minute call. We'll show you exactly how many buyers are searching for what you sell right now.
